

Business Studies Curriculum: Impact

At The Lakes School, our Business Studies curriculum ensures that all learners develop detailed knowledge and skills, leading to strong academic achievement and preparation for future endeavours, in line with the Ofsted Education Inspection Framework (EIF). Upon completion, students are well-prepared for the next stage of their education, employment, or training, with qualifications that align with their interests and aspirations.

By the time students complete Key Stage 4 in Business Studies, they will have developed:

- A genuine passion for business and entrepreneurship.
- A comprehensive understanding of business concepts and a wide range of transferable skills, including critical thinking, problem-solving, and effective communication.
- The ability to analyse, debate, and discuss complex business issues.
- An appreciation for ethical business practices and a commitment to sustainability.
- An entrepreneurial mindset and the confidence to innovate and lead in various business environments.

Our curriculum aims to inspire students to become proactive and responsible global citizens, ready to make informed decisions and contribute positively to the local, national and global economy. Students leave The Lakes School not only with valuable qualifications but also with the knowledge and skills to pursue their ambitions and succeed in their chosen paths.
